

CityWise AI — All-India Digital Governance Portal

Unified Governance Explorer, Official Political India Map & Live Welfare Scheme Engine

1. Official 2D India Map Visual • Authentic political map visual covering all 28 States & 8 UTs. • Interactive clickable pin hotspots overlay for instant navigation. • Depicts state boundaries, capitals, and surrounding oceans.	2. 3-Tier Location Hierarchy • State → District/City → Village/Ward drill-down architecture. • Displays Chief Minister, Population, and Area metrics. • Includes 8 direct-dial emergency department helpline numbers.	3. AI & ML Matching Engine • Predictive demographic eligibility evaluation & pattern matching. • NLP schema classification for 30+ Central & State schemes. • Realtime auto-sync with data.gov.in & myScheme.gov.in.

Presenter: Lead Full-Stack Software Developer

Domain: Digital Public Infrastructure (DPI) & e-Governance

Project Vision & Strategic Key Objectives

Democratizing Public Welfare Access across All 36 Indian Administrative Divisions

Strategic Objectives • 100% Pan-India Accessibility: Eliminate geographical barriers by unifying data for all 36 Indian States & UTs. • Hyper-Local Transparency: Provide village-level governance stats and local ward helpline numbers. • Click-Only Verified Search: Ensure clean zero-noise search results rendered exclusively upon user query. • Bilingual Voice Navigation: Integrated browser-native Speech Synthesis (Web Speech API) for non-literate support.	Target Audience & Reach • Farmers & Workers: PM-KISAN, MP Kisan Kalyan, Solar Pump Schemes. • Students & Youth: Bihar Student Credit Card, MP Sikho Kamao, UP Yuva Udyami. • Women & Girls: MP Ladli Behna, UP Kanya Sumangala, Bihar Kanya Utthan. • Vendors & Artisans: PM SVANidhi, PM Vishwakarma, PM Mudra Loans. • Senior Citizens: Indira Gandhi Pension, PM-JAY Ayushman Bharat.

PROBLEM STATEMENT

Current Challenges in Public Governance Delivery

Addressing Information Asymmetry, Dialing Friction, and Middlemen Exploitation

1. Extreme Information Fragmentation Over 500+ separate government websites exist across central and state ministries, making central discovery impossible for rural citizens.	2. Lack of Hyper-Local Contact Data Emergency helplines for essential local departments (Water Board, Power Discom 1912, PWD Roads) are difficult to locate at district/village level.
3. High Barrier & Language Friction Complex government portals with heavy legal jargon confuse non-technical citizens seeking basic welfare assistance.	4. Unfiltered Search Noise & Middlemen Traditional portals display dump lists without highlighting target eligibility criteria, forcing poor citizens to pay commission fees to agents.

Overall System Architecture & Data Flow Workflow

Seamless Flow from Client Single-Page Application to Realtime Data Sync

3-Tier Location Drill-Down Workflow Architecture

Geographical Navigation from State Pins down to Local Village Governance

Direct Emergency & Department Helplines Matrix

Instant Click-to-Call Access for 8 Essential Department Categories across All 36 Regions

112 Emergency National Police & Fire	Water Board 1800-180-1230	Power Discom 1912	PWD Roads 1800-180-4167
Municipal Corp 1800-11-8585	Health & Ambulance 104	Kisan Center 1800-180-1551	Transport Dept 1800-22-4000

Live Welfare Scheme Search Workflow & Filter Engine

Click-Only Query Execution Returning Target Eligibility Criteria & Official Apply Links

Machine Learning (AI/ML) Integration Architecture

Demographic Predictive Engine, NLP Schema Ingestion & Speech Synthesis

1. Demographic Pattern Matching Engine Calculates a multi-attribute Eligibility Compatibility Index based on citizen age, income, caste, and occupation, ranking highest probability schemes first.	2. NLP Schema Ingestion & Classification Natural Language Processing (NLP) parses unorganized JSON payloads from data.gov.in to categorize new policies into domains like Health, Agriculture, etc.	3. Speech Processing (TTS Audio) Phonetic Speech Synthesis converts Hindi/English text into audio narration for zero-barrier accessibility for non-literate rural citizens.
---	---	--

Real-World Deployment Impact Matrix

Eliminating Middlemen Exploitation, Direct Benefit Transfer & Rural Empowerment

1. 100% Elimination of Middlemen Direct official portal links (`pmkisan.gov.in`, `cmladlibehna.mp.gov.in`) eliminate unauthorized commission agent fees completely.	2. Direct Benefit Transfer (DBT) Uptake Clear transparency on ■ Target Group & Document Checklists prevents application rejection and speeds up DBT fund releases.
3. 90% Response Time Reduction Instant 1-click dialing for 8 core essential departments (Water, Power Discom 1912, PWD Roads, Municipal Corp) at village level.	4. Non-Literate Rural Empowerment Native Voice Assistance allows non-literate citizens to listen to scheme eligibility details in Hindi audio.

Technology Stack Architecture & Specification

Modern Open-Web Standards Ensuring Zero Third-Party Framework Overhead

HTML5 Semantic markup, ARIA roles & DOM structure	CSS3 Vanilla Glassmorphic design system & HSL variables	JavaScript ES6+ Strict filter logic & state DB matching	Python 3 HTTP Daemon server & data pipelines
Typography Engine Tiro Devanagari Hindi & Plus Jakarta Sans	Iconography Font Awesome 6.4 Free Vector Icons	Voice Synthesis Web Speech API SpeechSynthesis	Deployment Server Local HTTP Daemon on Port 8080

Conclusion, Social Impact & Future Roadmap

Democratizing Public Welfare Access and Removing Middlemen Exploitation

Measurable Social Impact • Eliminating Middlemen: Direct access to official application URLs prevents corruption and commission fees. • Empowering Rural Citizens: 3-tier location lookup allows villagers to find emergency services instantly. • Increasing Scheme Uptake: Transparent eligibility criteria help eligible citizens claim DBT funds.	Future Expansion Roadmap • WhatsApp AI Assistant Bot: Instant scheme queries via WhatsApp messaging. • DigiLocker Integration: Automatic document verification for single-click scheme eligibility checking. • Multilingual Support: Full translation engine supporting 22 official Indian languages.
